

# Racial/Ethnic disparities in children's experience of parent death: the role of drugs and firearms in the US

Ben Schlüter

2023-06-16

Firearms and drugs are major causes of death in US.

Heterogeneous level of mortality from these causes across ethnic groups.

Translate into differing exposure to deaths in the family.

Here we study children's experience of parental loss, 1999-2020.

Kinship matrix model.
